

Trainer Debrief — Lab 32

Building the Steering Committee Presentation

Case study: Meridian Medical Devices — seal weld burst pressure

Objective: Build a presentation that leads with business impact and defends the analysis (A1-A5).

***TRAINER ONLY.** Do not hand this out before the lab is complete.*

Expected analysis

lab-32-steering-committee-deck.xlsx

Executives buy the RESULT and the CONTROL, not the method. Lead with the answer — slide 1 states the benefit and the capability gain — then spend the middle proving it and the end on sustainment. The commonest Black Belt error is presenting DMAIC chronologically, which puts the punchline on slide 9 after the audience has stopped listening. Every challenge in the log has a real answer from the labs: the MSA (Lab 11-12) answers trustworthiness, the control chart with recalculated limits (Lab 27) answers coincidence, the Finance-signed benefit sheet (Lab 30) answers the money, and the control plan with a named owner (Lab 29) answers what happens when you leave.

Every dataset is generated from a fixed seed, so these figures are reproducible — re-run the analysis on the shipped workbook and you will get these numbers.

What good looks like

Your presentation delivers the decision, benefit and ask within the first two minutes, charts are projector-legible, statistics are stated in business language, and every likely challenge has an appendix slide behind it.

Where this sits in the capstone

Sponsors are not statisticians. They want the decision, the money and the risk in the first two minutes, with the statistics available underneath as supporting evidence. This lab builds the deck you will deliver and defend in Lab 33.

The running process — figures that must reconcile

Checkpoint	Value	Established in
Baseline defect rate	2.9%	Lab 3
Measurement system	FAILS Gage R&R (~40% study variation)	Lab 11
Baseline capability	Pp 0.62 / Ppk 0.53	Lab 14
Proven Xs	clamp pressure, dwell time, electrode tip age	Labs 18-21
DOE optimum	clamp 47.4 bar, dwell 2.76 s	Labs 23-25
Improved capability	Ppk 1.40	Lab 27

Annual hard benefit	SGD 487,000 vs SGD 812,000 COPQ	Labs 1, 30
---------------------	------------------------------------	------------

If a learner's number disagrees with the column above, they have either used their own workplace data (fine — say so) or made an error (find it).
