

Team Worksheet — Lab 33

Capstone Presentation and Defence

Team members: _____

Date: _____

1. Our understanding of the problem

2. Our working

Use the data in `lab-33-capstone-defence-rubric.xlsx`.

3. What we produced

Deliverable: A delivered 15-minute presentation with a defended Q&A session.

4. What the evidence does NOT tell us

5. Our conclusion

6. Step notes

Step 1. Deliver your 15-minute presentation to the steering committee panel.

Step 2. Hold the two-minute rule under pressure — lead with outcome, benefit and ask.

Step 3. Take questions. Expect challenge on sample adequacy: was your sample size justified, and what power did your tests have?

Step 4. Expect challenge on the measurement system: how do you know the data is trustworthy? Have your Gage R&R or Kappa result ready.

Step 5. Expect challenge on assumptions: did you test normality, equal variance and independence, and what did you do when they failed?

Step 6. Expect challenge on confounding: what else changed during the period, and how do you know your intervention caused the improvement?

Step 7. Expect challenge on DOE: what was your design resolution, what effects were aliased, and did confirmation runs validate the optimum?

Step 8. Expect challenge on sustainability: what stops this from decaying in six months once attention moves elsewhere?

Step 9. Expect challenge on the benefit: is it hard or soft, who in Finance validated it, and over what period?

Step 10. Answer with evidence, not assertion. Go to your appendix. Where you do not know, say so and state how you would find out — this is far stronger than bluffing.

Step 11. Where a challenge reveals a genuine weakness, acknowledge it and state the mitigation. Defensiveness costs more credibility than the weakness itself.

Step 12. Observe the other presentations and record challenges you had not anticipated for your own project.

7. Self-check

You delivered within time, answered challenges with evidence from your appendix rather than assertion, and acknowledged genuine weaknesses with a stated mitigation.
