

Trainer Debrief — Lab 34

Lessons Learned, Mentoring Green Belts and Your Black Belt Journey

Case study: Meridian Medical Devices — seal weld burst pressure

Objective: Harvest lessons, plan your mentoring practice and map your continuing development (K1).

***TRAINER ONLY.** Do not hand this out before the lab is complete.*

Expected analysis

lab-34-lessons-learned-mentoring.xlsx

The mentoring sheet is the real Black Belt content here. The coaching approach must match the Green Belt's phase and confidence, not your preference: ASK when they have the capability and lack confidence, SHOW when the tool is genuinely new, TELL only where safety or regulatory compliance is at stake, and DELEGATE once they have done it successfully unaided. The commonest failure of a new Black Belt is doing the Green Belt's analysis FOR them — it produces a correct chart and no capability, and the Green Belt never leads the next one. Note that the four Green Belt projects here are the same ones from the Lab 2 portfolio, so the mentoring load is a real, traceable consequence of the portfolio you balanced on Day 1.

Every dataset is generated from a fixed seed, so these figures are reproducible — re-run the analysis on the shipped workbook and you will get these numbers.

What good looks like

Your lessons are separated into project-specific and transferable, you have a named Green Belt mentoring plan with a review cadence, and your 90-day plan has dated commitments.

Where this sits in the capstone

Close the course as you would close a project. Harvest what transfers, then turn to the accountability that most defines the role: mentoring Green Belts. A Black Belt is measured not only by their own projects but by the belts they develop.

The running process — figures that must reconcile

Checkpoint	Value	Established in
Baseline defect rate	2.9%	Lab 3
Measurement system	FAILS Gage R&R (~40% study variation)	Lab 11
Baseline capability	Pp 0.62 / Ppk 0.53	Lab 14
Proven Xs	clamp pressure, dwell time, electrode tip age	Labs 18-21
DOE optimum	clamp 47.4 bar, dwell 2.76 s	Labs 23-25
Improved capability	Ppk 1.40	Lab 27

Annual hard benefit	SGD 487,000 vs SGD 812,000 COPQ	Labs 1, 30
---------------------	------------------------------------	------------

If a learner's number disagrees with the column above, they have either used their own workplace data (fine — say so) or made an error (find it).
