

Team Worksheet — Lab 34

Lessons Learned, Mentoring Green Belts and Your Black Belt Journey

Team members: _____

Date: _____

1. Our understanding of the problem

2. Our working

Use the data in lab-34-lessons-learned-mentoring.xlsx.

3. What we produced

Deliverable: A lessons-learned record, a Green Belt mentoring plan and a personal development roadmap.

4. What the evidence does NOT tell us

5. Our conclusion

6. Step notes

Step 1. Run your own lessons learned: what worked in your capstone, what did not, and what you would do differently next time.

Step 2. Separate lessons that are project-specific from those that transfer to any project. Only the transferable ones belong in the organisational knowledge base.

Step 3. Record the two analytical techniques from this course you found most difficult, and plan how you will build fluency in them.

Step 4. Now the mentoring role. Understand the core principle: a Black Belt coaches Green Belts through their analysis rather than performing it for them.

Step 5. Learn the coaching question set: what does your data show, what have you ruled out, what assumption is that resting on, and how would you know if you were wrong?

Step 6. Identify where Green Belts most commonly need intervention — scope creep, wrong test selection, confusing correlation with causation, and skipping MSA entirely.

Step 7. Plan your tollgate review approach: what evidence you require at each gate before allowing a Green Belt project to proceed.

Step 8. Decide when to intervene directly versus letting a Green Belt learn from a recoverable mistake. Both have costs.

Step 9. Draft a mentoring plan for one Green Belt in your organisation: their project, their development gaps, your review cadence.

Step 10. Map your certification pathway: project logging requirements, the certification body's criteria and any remaining evidence you need.

Step 11. Identify your next portfolio project from the Lab 2 map, and set a start date.

Step 12. Write your 90-day plan: complete or hand over the capstone, begin mentoring, and select the next project.

7. Self-check

Your lessons are separated into project-specific and transferable, you have a named Green Belt mentoring plan with a review cadence, and your 90-day plan has dated commitments.
